

# True-Blue T1s

“Speakeasy is unique in their exceptional reliability, competitive pricing, and dedicated account management.”

- Mike Williams, Director of Information Systems  
Silver Cloud Inns

## Speakeasy sets the standard for T1 service

T1s are the industry standard for mission-critical business connectivity, but not all T1s are created equal. Speakeasy provides the best T1 value for small business customers.

Take Silver Cloud Inns for example. They've been a Speakeasy customer for four years, and they recently upgraded to full 1.5 Mbps T1s at all of their hotels throughout Oregon and Washington.

### Here's why:

- » **Dedicated Support** – Mike Williams, Silver Cloud's Director of Information Systems, enjoys a productive ongoing relationship with one experienced Speakeasy support technician who understands his needs.
- » **Robust SLAs** – Speakeasy guarantees 99.99% uptime, 100% port speed, 60ms latency, and 99.8% packet delivery. Silver Cloud doesn't have to worry when 75 guests and employees are all using the same T1 line.
- » **Unbeatable Reliability** – We continually manage capacity and monitor traffic on the nationwide Speakeasy fiber optic network to prevent bottlenecks and deliver on our SLA guarantees.

Speakeasy offers a range of T1 service options. We can even bond two full T1s to provide seamless 3.0 Mbps connectivity—perfect for server/application hosting or businesses with growing bandwidth needs.

**Call 1-800-815-6536 today.**

We'll help you select the right T1 service for your business.
